

Week4 Day 1 Assignment:

Creating jsonl files to use in finetuning model

1. Extract the leaflet and training data file and open the folder through VS code
2. Once done modify the input and output directory location as follows(in my case)

```
String inputDir = "D:\\Users\\a.natarajan\\OneDrive -  
Corpay\\personal\\finetuning\\training\\training";  
String outputFile = "D:\\Users\\a.natarajan\\OneDrive -  
Corpay\\personal\\finetuning\\training\\Anandhi_data_chat.jsonl";  
I have named the jsonl file as Anandhi_data_chat.jsonl
```

3. Let's run the java program and the file is created as expected in the specified folder with the specified name

☐ Name	Status	Date modified	Type	Size
 training		5/1/2026 8:37 PM	File folder	
☒  Anandhi_data_chat.jsonl		5/1/2026 8:54 PM	JSONL File	25 KB

Anandhi_data_chat.
jsonl
